INTRODUCTION

ABOUT RIGTECH INDUSTRIES

Rigtech Industries are an agile, bespoke product services company that helps our clients to bring their product design to life, in a quick, cost effective and convenient way without compromising quality.

The industries we work with need to reduce cost of production components & innovate to increase profit, whilst meeting quality, safety, environmental & ethical standards. However, often the setup cost of design, tooling and initial production is often prohibitive to companies engaging in new, special purpose or custom-made products.

While we can supply quality commodity products to large users and distributors, we also specialise in the design, manufacture and testing of a wide range of innovative new forged and cast products for our customers worldwide.

Our bespoke services include application, product analysis, CAD, prototyping, engineering and testing right through to final manufacture, to meet all our customers design and brand requirements. Rigtech Industries specialise in working closely with our clients to help them create engineered products that solve their business needs.

Complementing our standard product range and contract manufacturing, machining and assembly services, our adaptive services and manufacturing covers even more diversified industries such as automotive, forestry, ports & shipping, machinery manufacturers and capital equipment suppliers.

OUR PROCESS

At Rigtech Industries we can design, engineer, prototype, manufacture and assemble bespoke metal products of various materials such as aluminium, stainless steel, low carbon steel and brass. We are capable of computerised design and 3D modeling, have multi-axis precision machining and can conduct material content analysis, metallurgical and tensile strength testing.

OUR CAPABILITIES

We are a contract manufacturer specialising in precision machining and assembly to our clients specifications. Our scope includes the following key areas:

- Specialising in the manufacture & supply of rigging, lifting and lashing products.
- Product development of forged, cast, fabricated & machined products of all sizes.
- Independent engineering and product testing for accurate outcomes.
- Associated quality manufacturing through our specialised partners in China.
- Quality Assurance & pre-shipment inspection.

SHACKLES

US Type Forged Bow Shackle

- In compliance with US Fed.RR-C-271D, Type IVA, Grade A Class 2.
- Body made from carbon steel, pin from alloy steel, heat treated.
- Proof tested to 2 times WLL.
- Min.breaking load equals 5 times WLL.
- Surface finish: hot dipped galvanized, zinc plated or self-coloured.
- Individual inspection for appearance and assembly before delivery.

SHACKLES

A.S. Type Grade S Dee Shackle

- In compliance with AS2741.
- High quality carbon steel, Drop forged & Heat treated.
- Proof tested to 2 times WLL.
- Minimum Breaking Load equals 6 times WLL.
- Surface finish: hot dipped galvanized, zinc plated, powder coated or self-coloured.
- Individual inspection for appearance and assembly before delivery.

SHACKLES

DIN82101 Shackle

- In compliance with DIN82101.
- Carbon steel, Drop forged.
- Proof tested to 2 times WLL & Min. breaking load equals 4 times WLL.
- Surface finish: hot dipped galvanized, zinc plated or self-coloured.
- Individual inspection for appearance and assembly before delivery.

G80 Connecting Link

- Comply with EN1677-1.
- Connecting link for Master link, Hook and Chain.
- Important to ensure nut is not overtightened and the the bolt can freely rotate.

SHACKLES

Grade 80 Safety Dee Shackle

- Manufactured from alloy steel.
- Proof load equals 2 times WLL and minimum breaking load equals 6 times WLL.
- Surface finish: hot dipped galvanized or powder coated.
- Individual inspection for appearance and assembly before delivery.

Lifting Super Shackle

- According to standard:RR-C-271D, Type IVA Class 3 Grade B, SS-EN-13889+A1-2008.
- (BODY AND BOLT)Super alloy steel-Quenched and Tempered.
- Breakage test.
- 100% magnaflux crack detection.
- Permitted useful temperature range:-40°C-200°C.
- Dee or Bow shackles with screw pin & Dee shackles with safety pin also available.

TURNBUCKLES

DIN1478 Pipe Body Turnbuckle Eye & Eye

- Comply with DIN1478. Other types Jaw/Eye, Eye/Eye, Jaw/Jaw also available.
- Manufactured from carbon steel.
- Surface finish: hot dipped galvanized or zinc plated.
- Individual inspection for appearance and assembly before delivery.

G80 CHAIN FITTINGS

G80 European Type Connecting Link (Complies With EN1677)

- In compliance with EN1677.
- High tensile forged alloy steel, quenched & tempered.
- 100% magnaflux crack detection, and individually proof tested at 2.5 times WLL.
- Min. Breaking load 4 times WLL, batch tested.
- Eddy current test for all the load pins.
- Fatigue tested for 20000 cycles.
- Surface finish: Powder coated.
- Individual inspection for appearance before delivery.

G80 CHAIN FITTINGS

G80 Clevis Forestry Hook

- In compliance with EN1677.
- High tensile forged alloy steel, quenched & tempered.
- 100% magnaflux crack detection, and individually proof tested at 2.5 times WLL.
- Min. Breaking load 4 times WLL, batch tested.
- Eddy current test for all the load pins.
- Fatigue tested for 20000 cycles.
- Surface finish: Powder coated.
- Individual inspection for appearance and assembly before delivery.

G80 Universal Lifting Eye (Complies With EN1677)

- In compliance with EN1677.
- High tensile forged alloy steel, quenched & tempered.
- 100% magnaflux crack detection, individually proof tested at 2 times WLL, each checked with measurement gauge .
- Min. Breaking load 5 times WLL, batch tested.
- Surface finish: Zinc plated then powder coated.
- Individual inspection for appearance and assembly before delivery.

G100 Eye Self-Locking Hook

- High tensile forged alloy steel, quenched & tempered.
- 25% stronger than G80 products.
- 100% magnaflux crack detection, and individually proof tested at 2.5 times Working Load Limit.
- Min. B/L at 4 times of WLL, batch tested.
- Fatigue test for 20000 cycles.
- Powder coated.
- Individual inspection for appearance before delivery.

GENERAL HARDWARE

Wire Buckle

- Wire buckle for medium weight packaging and other different application.
- No toll required but can be used with tensioners available to suit 12mm and 15.5 mm heavy PP strapping (3000 per pack) and 19mm heavy duty woven polyester Strapping(1500 per pack).
- Self-coloured or galvanized.

WEBSLING

LIFTEC Flat Webbing Slings

- 100% high tenacity polyester.
- Thermo-fixation to minimize elongation and to stop ingress of dirt causing damage.
- Colour coded as Per EN1492-1, and striped with WLL indicator.
- Each sling is individually numbered with an unique serial number and certificate.
- Full manufactured and tested to EN 1492-1 standard.
- TUV certified

Available:

- Safety Factor of 8:1, 7:1 and 6:1 webbing slings.
- Single ply, Double Ply or 4 ply slings in eyed or endless type.
- With or without sling eye protection, also full sling length sewn webbing protection.

ROUNDSLING

LIFTEC Round Slings

- 100% high tenacity polyester
- Double ply sling wall cover to protect from wear and ingress of dirt causing damage
- Colour coded as Per EN1492-2, and striped with WLL indicator.
- Full manufactured and tested to EN 1492-2 standard.
- Each sling is individually numbered with an unique serial number and certificate.
- TUV certified

Available:

- Safety Factor 7:1 and 6:1.
- Single or double ply sling wall cover.
- Concealed sewn label to protect label from tearing.
- Larger sizes up to 50 tonnes sling also available upon request.

LT-HSZ-D CHAIN HOIST

- Different capacities with or without overload protection can be available.
- Batch tested and duly inspected.
- All load pins are individually NDT tested.

LT-HSH-X LEVER HOIST

- Different capacities with or without overload protection can be available.
- Batch tested and duly inspected.
- All load pins are individually NDT tested.

LT24-0201	35	20	102	141.2	180	345	30	24	1.47

Casting Parts

- Alloy steel, stainless steel can be precision casted, processed and heat treated.
- Fully tested.

Trailer Chain Assembly

- Chain length can be different as requested.
- Zinc plated.
- Min. breaking load 70KN.
- Inspection for appearance and assembly before delivery.

ART.NO.	Dimensions(mm)

Roof Rack for Mining

ASSORTED

Stainless Steel and Aluminium Tags for Chain Slings

- Material can be stainless steel 304 or aluminium.
- Screen printing or etched printing can be used, and size can be made as you requested.
- Wire in different sizes and lengths can be available.
- Inspection for appearance before delivery.

Assembled G80 Chain Slings

- Each component complies with EN 1677 .
- The combination (one leg, two legs, four legs) can be made as requested.
- Inspection for the assembly before delivery.

Drum Lifter

Type	Working Load Limit.		Proof Test	CHAIN		MASTER LINK			REACH
	Single	Double		Diameter	Length	Dia.	Inside Width	Inside Length	
DR-1	500 kgs. 1100 lbs.	1000kgs. 2200 lbs.	2000kgs 4400 lbs.	6.3mm 1/4 in.	516mm 20 1/3 in.	13mm 1/2 in.	66mm 2 3/5 in.	93mm 3 2/3 in.	690mm 27 1/6 in.

Wire Rope Core Stage Slings

- Endless galvanized steel 7x7 wire rope inner core, encased in heavy duty black polyester tubing cover.
- Light weight and high heat resistance.
- Black colour, for blending into surroundings, suitable for suspension applications in performing, sound and lighting industries.
- Inspection window access.

ART. No.	Colour	WLL T	Length M	Min. Bending Radius	S/F
LT24-0512	Black	2	1, 2, 3	6mm	5 to 1

Super Flexible Cable Sling

- Made of steel cable of plated configuration, unlike wire rope that is laid or twisted.
- Heavy duty with great flexibility, toughness and durability.
- Safer to use and easier to inspect than synthetic slings.
- High temperature resistant, up to 400 degree Celsius.

ART.NO.	Diameter	Eye Size	SWL	Min.Tensile Strength	Wire Rope Dia	Wire Rope Construction
LT24-0513	12mm	220mm	1.4t	2070MPa	3mm	4 x19

Wireless Load Cells

Load cells are a necessary instrument for load testing with water-filled weight bags. Measuring capacity is available as 2t, 5t, 10t, 20t, 30t, 50t, 100t, and 200t. Wireless load cells are used for the weight measuring of proof load testing using such water-filled weight bags. The load cell set consist of a load link with two shackles, wireless readout and high quality carry case.

Our load cell is an extremely well-built instrument for industry use, as a standard wireless tool offering universal applications, whether used as a conventional crane weight or to measure force, it is microprocessor controlled for precision accuracy, calibration is easier with wireless indicator.

TECHNICAL DATA	
MEASURING CAPACITY	2t, 5t, 10t, 20t, 30t, 50t, 100t, and 200t
DISPLAY	18mm 6 digits LCD
POWER-ON ZERO RANGE	20% F.S.
MANUAL ZERO RANGE	4% F.S.
TARE RANGE	20% F.S.
STABLE TIME	<= 10 seconds
OVERLOAD INDICATION	100% F.S. +9e
MAX. SAFETY LOAD	125% F.S.
ULTIMATE LOAD	400% F.S.
BATTERY LIFE	>= 40 hours
BATTERY TYPE	LR [^] (AA) alkaline batteries 1.5V x3
OPERATING TEMP	-10°C > +40°C
OPERATING HUMIDITY	<= 85% RH under 20°C
WIRELESS DISTANCE	Min. 80m (200m optional)
WIRELESS FREQUENCY	2.4GHz (default), 43.3MHz / 8.60MHz (opt)

Load Testing Water Bags

A wide range of sizes of load testing water bags are available. The main size of water weight bags is from 1 tonne to 50 tonne. Many water bags can be used together to load testing over 50 ton with the different combinations. (Note: Other size can be supplied upon request. The below specifications are for your reference. Please refer the technical data sheet for the exact size.)
